CHILD PROGENY

V. Kotravel*¹ and A. R. Gautham¹

¹*School of Vedic Astrology, Vels Institute of Science, Technology and Advanced Studies (VISTAS), Pallavaram, Chennai, Tamilnadu, India.

ABSTRACT

Child progeny makes human life a special and meaningful one. Child progeny planet is Jupiter, on the natural Zodiac 5th house is Leo and its lord is Sun which also contribute to the child progeny. The placement of Sun, Jupiter on natal chart, along with aspects by and on both planets, the stars through which the planets gives out its influence. The above mentioned factors governs the possibilities of a good child progeny. Based on one's good | bad karma, one will attain timely child or delayed progeny, child adaption, loss of child, happiness from progeny etc. This article is eye opener on this subject using various astrology Vedic text as reference.

KEYWORDS

Child progeny, Vedic and Human life.

INTRODUCTION

'The pipe is sweet,' 'the lute is sweet,' by them't will be averred,

Who music of their infants' lispings lips have never heard.

The above lines are from Tirukkural by Thiruvalluvar from Tamil Nadu, India. He was very famous and regarded as a saint on his short and very potent quotes on life. The above couplet says, People praise the music and music from different pleasant instruments are great ONLY when they don't listen to a child's speech.

Child progeny gives liberation in this and next life that follows. It makes one' life special, meaningful and happy. An embryo is a seed of a child which is blend of Sperm from a Man and Egg from a Women. The sperm and egg along with its

secretion, action are all govern by the universe in a much scared way.

Zodiac Signs : **Five**

Elements

Aries - Leo – Sagittarius : Fire
Taurus - Virgo – Capricorn : Earth
Gemini - Libra – Aquarius : Air
Cancer - Scorpio - Pisces : Water

Planets and 5 Elements

Sun : Fire
Moon : Water
Mars : Fire
Mercury : Air
Jupiter : Space
Venus : Water
Saturn : Air
Rahu : Air
Ketu : Fire

The above mentioned planets, 5 elements mix and create life energy in earth. One can use beneficial Days, Stars and Tithi for auspicious child progeny.

Day

Monday-Wednesday-Thursday-Friday are special days.

Tithi

Dwitiya, Tritiya, Panchami, Shashthi, Saptami, Dasami, Ekadasi Trayodashi are special Tithi.

Stars

Rohini, Uttra Phalguni, Hastam, Swathi, Anuradha, Moola, Uttarashadha, Shravana, Shatabisha, Uttarabhadrapada, Revati. These 11 stars are first class.

Aswini, Mrigashira, Punarvasu, Pushya, Chitra, Dhanishta are secondary best stars for child progeny.

However, one natal birth star and its 5th star from natal star should NOT be selected for child progeny.

Signs

Taurus, Gemini, Cancer. The 6 zodiac signs of Leo, Libra and Pisces should be in Ascendant.

By calculating the above periods and fixing auspicious timings, after that a couple worship their family | clan deities, then copulates will attain a happy child progeny.

The date of physical conception is 6, 8, 10, 12, 14 from the days of the woman's menstruation to the birth of male child and for female baby on days 5, 7, 9, 11, 13.

At the time of copulation, if the ascendant is in even rasi and moon is nearby, the child will be female where as if moon in odd rasi with Saturn in Ascendant, the child is a male progeny. If Jupiter and Sun in Ascendant and the ascendant is an odd rasi, then the child will be a male progeny. In addition, Sun, Moon, Mars, Venus are in their own houses, and presence of Jupiter in Ascendant, or 5th or 9th house, a male child will born to the couple.

Everyone likes to have their child to have care, love, affection, intelligence, skilfulness, education, career and attain name, fame along with longevity. To fulfil the above desire of a parent, one has follow certain discipline during the copulation time as mentioned below.

The time is divided broadly as Satvic, Rajesic and Tamasic based on their exhibition of the qualities during that time. These times are 90 mins in duration, for best child progeny, the parents must choose Satvic and Rajesic timings as their copulation times. In natural zodiac, the Leo|5th house along with Sun and Jupiter is considered as major factor for a child progeny however in reality, they are some more factors plays vital role in giving child progeny.

Upon analysing sample horoscope of couples who were married as per Indian Vedic marriage ritual earlier and examining their horoscopes individually as per using rules that are applicable of child progeny, this article explains the findings.

An excellent astrology text – Jathaga Parijatham explains child progeny in mini couplets (Shlokas) from verses 32 to 48 in 13th chapter.

Beeja Sputa [Male's Sperm Strength]

In a man's horoscope, add the degrees of Sun, Venus and Jupiter. If the sum is beyond 360 degrees, then subtract 360 from the sum. The remaining sum degree falls on Male Rasi, and denotes male rasi in D9|Navamsa chart, the male can have a child progeny without any difficulty.

If the remainder sum falls on Male Rasi but it denotes a female rasi in D9, the male can have a child progeny only after certain efforts and remedial measures.

If the remainder sum falls in Female Rasi and also denotes a female rasi in D9, the person will NOT have a child progeny and consider as unlucky with child.

Kshetra Sputa [Female's Egg | Ovary Strength]

In a female's horoscope, add the degrees of Moon, Mars and Jupiter. If the sum is beyond 360 degrees, then subtract 360 from the sum. The remaining sum degree falls on Female Rasi, and denotes female rasi in D9|Navamsa chart, the female can have a child progeny without any difficulty.

If the remainder sum falls on Female Rasi but it denotes a male rasi in D9, the female can have a child progeny only after certain efforts and remedial measures.

If the remainder sum falls in Male Rasi and also denotes a male rasi in D9, the person will NOT have a child progeny and consider as unlucky with child.

SantanaTithi

Santana Tithi is mentioned in Kerala astrology. Subtract Moon degree from Sun degree and multiply the answer with 12. Then add 1 to the result to find out Tithi.

Multiply Sun degree with 5 results in Santana Sun (SS) and Multiply Moon degree with 5 results in Santana Moon (SM). Subtract SM from SS. If the result is more than 360, the subtract 360 from the answer to arrive the result which must be less than 360.

If the result is less than 180 degrees, the SantanaTithi is Shukla Paksha (Waxing Moon) Tithi. If it is from 180 to 360, then the SantanaTithi is Krishna Paksha (Wanning Moon).

Divide the result by 12 to find the Tithi. If the Tithi is Shukla Paksha, then Child Progeny is highly possible. Even if the Tithi falls on Shukla Paksha, however if falls on Chaturthi, Shashti, Ashtami, Navami, Dvadasi and Chaturdashi then SantanaTithi is considered as Chitra Tithi. One has

to do remedies measures as prescribed from Vedic text for possible child progeny.

If during Krishna Paksha, if the SantanaTithi falls on the above mentioned Tithi, the possibilities for child progeny is rare or difficult to attain. However, if the SantanaTithi falls on other 9 Tithis, one can have a child progeny after performing various remedial measures, rituals.

Child Progeny Planet's Position

Early life child progeny

Delayed child progeny

Child Adaption

Child Progeny Timings

Rules for Happier Child Progeny

Rules for a Disabled Child progeny

Rules for Ill-health Child progeny

Rules for Living Away from child

Rules for getting benefits from a Child Progeny

Sadness and Dosha from Child Progeny

Early life child progeny

Rule No.1

Close association between 5th bhava lord and ascendant lord or ascendant.
