In Astrology transit of planets i.e. Kochara Planets prediction is very important. Than natal (Horoscope) planets; without planets movement i.e. transit of planets there is no astrology it is in truth.

Transit planets uses and its importance

If we want to know a man's future life happenings, then we go to see the planets link in his natal chart horoscope. At the same time benefit or salient features, good or bad happenings are come to across with the help of transit planets or moving of planets in the zodiac.

Transit planets indicate and help to us mother's love, father's blessings, teachers guidance, god who gives and forgives, holy water which cures sin, supportive wife, son and friendship in ups and

down, food and water which cures hunger and thirsty, mind which surrenders to god etc.

Dr. Pulipani Sundara Varadachariar said in his kochara palangal book, birth star of birth (rasi) based on daily benefits are called rasi palan or transit benefit i.e. kochara palan.

In nadi astrology sidha yogi sivadasan Ravi said in his book, in nadi planet conjunction with other planet vision look means, a planet link with, 1-5, 9-3, 7, 11-2-12, it have creates benefit in 3, 7,11 and 2 Bhava's vision looks are not applicable for Ragu and Kethu.

In Parasarar's method of horoscope prediction in astrology for transit of planets, it is based on moon for birth rasi sign. In this moon based method in every Bhava in every time of the transit planets benefits i.e. better or worse happens when it moves sign were already said.

Transit planets with natal planets conjunction or collide with each other in horoscope creates some power then the transit planet give some benefits.

If we predict of a man's horoscope, for future period, first we find out the natal planets benefit period, and then transit planets benefits accordingly.

A Transit planet conjunction with natal planet it gives benefits in better ways to a man in his horoscope planet i.e. natal planet is in friendly manner, if it is in enemy planet then it gives sorrowful worse benefits.

When we saw the prediction in a man's horoscope, at that time good dasa bhuthis are present or happens, while on the time of transiting planets, are also in good movements the gains happened better upto 100% for that man.

In Dasa bhuthi natal planets are in good ways, but the transit planets are in worse condition it made obstruction for the good benefits.

Now a days in daily, weekly, monthly, journals published the transit planets prediction i.e. Kochara palan are based on the planets movements. It is also called Rasi (Sign) palangal.

Kochara prediction or transit of planets benefits, denotes the moon crossed in a rasi or sign and also the movements of the transit planets in a rasi or sign.

KOCHARAM – DEFINITION OF TRANSIT OF PLANETS

In transit planets themselves do not act independently in the zodiac. Their actions are being governed under the control of the luminaries Sun and Moon. That is the reason fate is being appraised by us with reference to moon as dasa bhuthi, periods also.

Moon in transit on a particular day when the moon it is posited in a star of a planet play the leadership oral on that day and all other planets would act as workers under that starlord planets.

The planets offer their potentials depending upon their transitory positions. The planets while passing over the stars in transit are called as Kocharam.

Planets + move = planets movement Kocharam means transit of planets in the zodiac without any break, and link with natal planets of everyone, gave some benefits of good or bad means kochara palangal or prediction in transit planets periods.

In astrology planets present timely movements or position are called as transit of planets or Kocharam. This type of method were already present in the early centuries. It generally based on a rasi or sign and the prediction said for the present planets crossed on the rasi or sign.

TRANSIT OF PLANETS

The planets are the prefectual wanders and they keep on moving constantly. In the birth chart, they are fixed at the movement of time of the native's birth.

The planets on the movement are called the transiting planets. During these transits (called kocharam in Indian astrology) the planets by virtue of their newly assumed positions give out new effects on the forecasts.

Transiting of a planet means, movement, of that planet from one sign (Rasi) to the other, and from one constellation (Nakshtra) to another when it enters or makes a connection with any zodiac sign or the nakhtra, it shows some effects which can be either good or bad. If the influence is good it brings good or positive changes or events in life but negative influence gives undesired results.

Moreover they combine or aspect the planets in the birth chart. And thirdly they form angles with the other planets all these are signification in astrological predictions.

All the planets transit around the ecliptic, which is the belt around the earth with varying speed and periodically.

NATAL PREDICTION DASA PREDICTION, TRANSIT PREDICTION

In astrology the term transit refers to the ongoing movement of the planets, in contrast to their constant positions at the birth or when some notable event occurred.

Once the periods of events are determined for their actions, then they are to be checked with corresponding transit positions in between the dasa, bhuthi anthara periods.

Dasa Bhuthi and anthara lords while transiting it happens to be tranversed in starlord of the cuspal sub-lord of 8, 12 bhavas to the questionable event bhava fail to materialize during that interval period.

The transit effects decide about that changes are happening at the present and also help to determine the course of one's future.

The natal predication, the dasa prediction and the transit predication are complimentary to each other. All these three effects are studied using the planetary influences only, but they differ among themselves.

The natal chart tells about the whole life of the native and what are the things that are in store for him. The dasa predictions notify when the effects are going to happen. In transit the effects are confirmed.
